DETAILED ACTION

1. The amendment filed June 27, 2001 has been entered. It is noted that in view of the new amendment practice under 37 CFR 1.121 which became mandatory for all amendments on March 1, 2001, and due to the limited amount of examining time per application, if the amendment contains changes to existing language that requires a marked-up version showing those changes, the Examiner is relying upon the marked-up version(s) for examination of the application. It is applicant's responsibility to ensure that the clean version(s) is (are) the same as the marked-up version(s). It is further noted that the clean version(s) is (are) considered to be the Official version(s).

Drawings

- 2. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on June 27, 2001 have been **approved**.
- 3. The drawings remain objected to because of the following informalities:

In Figure 15, the numerals in the lower left portion of the figure (below numeral 4) are not clearly shown (it is noted that they appear to read "86" and "100", but it seems that they should read --186-- and --180--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. Claims 5-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5, line 1, structural cooperation is not positively provided for "locking mechanism".

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1 and 5-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Shiotani et al., pn 5,116,249.

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Application/Control Number: 09/495,733

Art Unit: 3724

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 8-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shiotani et al., pn 5,116,249.

Shiotani lacks the specific locking mechanism configuration. However, the Examiner takes Official notice that such locking mechanism configurations are old and well known in the art and provide various known benefits including providing a more stable and secure locking action for elongated features (e.g., tables, fences, etc.). Therefore, it would have been obvious to one having ordinary skill in the art to provide the specific claimed locking mechanism configuration for the well known benefits including that described above.

Conclusion

- 9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark Dexter whose telephone number is (703) 308-1404.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Rinaldi Rada, can be reached at (703)308-2187.
